**Account Management**

One of Camelot Illinois’ priorities is to streamline and improve the Illinois Lottery ticket management process.

- Illinois Lottery retailers receive a dedicated Lottery Sales Representative for in-store support and a Tel-Sel Representative for customer service and ordering support.
- You are not required to pay for Instant Tickets until 90 days after their activation or whenever the tickets are actually sold, and the cash is in the drawer (i.e., 90% redeemed).
- Accounting for terminal sales is automatically performed for you by the terminal.
- Each week, a report shows you how much you owe the Illinois Lottery; this amount is collected through Electronic Funds Transfer (EFT).
- Commissions, selling bonuses, and cashing bonuses are credited to you each week.
- Daily reports and running sales totals can be produced on-demand.

Here's what some of our customers have to say about us:

[The Lottery] brings in a lot of foot traffic. We like those players who come in twice a day. When they do, they pick up items twice a day, win-win. They buy groceries and get their lottery ticket at the end or come in to buy a lottery ticket and say, ‘I just need to grab one item.’ When they go back, they pick up other items as well.

Offering Lottery in our stores is definitely a traffic driver. Selling Lottery also increases basket size as customers usually leave the store with other items. Customers enjoy the convenience of buying tickets as they gas up their cars or pick up their snacks and drinks.
